1962

*Mechanicam vero duplicem Veteres constituerunt: Rationalem quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique Mechanica nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut Mechanica omnis a Geometria ita distinguatur, ut quicquid accuratum sit ad Geometriam referatur, quicquid minus accuratum ad Mechanicam. Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.*

NEWTON

*La généralité que j'embrasse, au lieu d'éblouir nos lumières, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité.*

EULER

*... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum.*

LEIBNIZ

---

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely in original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

## CONTENTS OF VOLUME 9

	Page
BECKERT, H., Existenzbeweise in der Theorie permanenter Schwerewellen einer inkompressiblen Flüssigkeit längs eines Kanals . . . . .	379
BECKERT, H., Potentialströmungen längs eines Kanals mit welliger Kanalsohle . . . . .	395
BRAESS, D., Die Konstruktion monotoner Iterationsfolgen zur Lösungseinschließung bei linearen Gleichungssystemen . . . . .	97
BRAMBLE, J. H., & L. E. PAYNE, Some Uniqueness Theorems in the Theory of Elasticity . . . . .	319
BULIRSCH, R., Existenznachweis und Approximation von Eigenwerten und Eigenfunktionen mit Hilfe eines Differenzenverfahrens bei singulären Sturm-Liouvilleschen Randwertaufgaben . . . . .	111
COLEMAN, B. D., Kinematical Concepts with Applications in the Mechanics and Thermodynamics of Incompressible Viscoelastic Fluids . . . . .	273
COLEMAN, B. D., Mechanical and Thermodynamical Admissibility of Stress-Strain Functions . . . . .	172
CONLAN, J., An Existence Theorem for the Equation $u_{xyz}=f$ . . . . .	64
DUFFIN, R. J., Pseudo-Hamiltonian Mechanics . . . . .	309
DUREN, P. L., & M. SCHIFFER, A Variational Method for Functions Schlicht in an Annulus . . . . .	260
DYER, R. H., & D. E. EDMUNDS, On the Existence of Solutions of the Equations of Magnetohydrodynamics . . . . .	403
EDELEN, D. G. B., & T. Y. THOMAS, Discontinuities in the Einstein Field for General Momentum-Energy Tensors . . . . .	153
EDELEN, D. G. B., & T. Y. THOMAS, Differential Compatibility Conditions on the Momentum-Energy Tensor and Necessary Conditions for the Existence of Solutions to the Einstein Field Equations . . . . .	245
